Boba Fett Collector Set

Boba Fett Central Tourbillon

10 PIECES

45mm, grade 5 titanium

The Galaxy's most famous bounty hunter

Kross Studio presents a limited exclusive collector set inspired by the legendary Star Wars bounty hunter, Boba Fett™. Each of the 10 Collector Set complete with a numbered, manual wound Boba Fett™-inspired central Tourbillon timepiece and a watch display made inspired by Boba Fett™'s famed starship.

KS 7'000 Caliber

The timepiece is equipped with our in-house KS 7'000 caliber. Conceived by Marco Tedeschi, this caliber stems from a desire to craft a horological complication with a notable power reserve. Equipped with an impressive oversized barrel, only the center of the movement could accommodate the regulator and the tourbillon, uniting form and function. This grants the Boba Fett Central Tourbillon a power reserve of over 120 hours and a unique design thanks to the position of its components.

Peripheral time display

Kross Studio has employed a distinctive peripheral format for reading the hours and minutes through a planetary gear system that orbits 360 degrees around the tourbillon. A 12-factor gear ratio allows the planetary minutes system to empower the progression of the hours. To optimize the movement's efficiency as much as possible, the hour and minute display system is fixed on two very wide and high-precision ball bearings.

Case Back

On the back of the case, the Studio's signature cross emblem is delicately emphasized on the barrel bridge. The fully skeletonized design provides a deep insight into the meticulously detailed components, showcasing wheels adorned with the Mythosaur skull.

Winding the watch and setting the time are effortlessly achieved using the «D-ring crown» on the case back and the «Time Set» push button, strategically positioned at 3 o'clock along the watch's edge. This system not only maintains design symmetry and enhances comfort compared to a traditional crown, but it also facilitates quicker winding, adding a practical touch to the overall experience.

Interchangeable Straps

The timepiece comes with three sets of straps: the first is in green polyamide strap embossed with the pattern of Boba Fett™'s chest armor, the second one is in chocolate color calf leather strap and the third one is in black rubber.

The straps can be easily changed thanks to our interchangeable strap system, facilitated by two quick-release buttons conveniently placed on the underside of the case, allowing for seamless customization based on individual preferences.

Aluminum, acrylic, and resin

A watch in the cockpit

The creation of the Boba Fett™'s starship-inspired watch display included a thorough analysis of the screen-used prop, ensuring an accurate and detailed representation of the iconic starship. Moreover, an enhancement has been incorporated into this starship, enabling it to seamlessly incorporate the Boba Fett™ Central Tourbillon watch. It effortlessly assumes its position in the cockpit, replacing the iconic pilot with remarkable naturalness.
