COLLECTOR SET

Death Star Tourbillon watch
Inspired by the Death Star legacy, the watch is equipped with a mechanical manual-winding central tourbillon movement.

Authentic kyber crystal movie prop
The kyber crystal was screen-used in the making of the movie *Rogue One: A Star Wars Story*.

Kyber Crystals Container
Reproduction of the kyber crystals containers of the *Star Wars*™ saga.

“That’s no moon. It’s a space station.”
Obi-Wan Kenobi™

INSPIRATION

Death Star
A mobile moon-sized space station equipped with a powerful superlaser. Built by the Galactic Empire to demonstrate its military strength.

Superlaser
Death Star superweapon with devastating destruction abilities, fueled by the power of 8 kyber crystals, whose array is capable of destroying an entire planet in one blast.

Kyber crystals
The rare Force-attuned crystals are used by Jedi™ and Sith™, concentrating the energy in a unique way.

Essential for the construction of a lightsaber, they are also used as the main source of energy for the Death Star superlaser.

Containers
The containers are used to store and transport kyber crystals from the mines to the Death Star.

The powerful and precious nature of those crystals required them to be stored in individual capsules, inserted in armored containers.

DEATH STAR TOURBILLON WATCH

The Death Star Tourbillon is equipped with a central tourbillon movement and a peripheral display of hours and minutes.

The movement grants a 5 day power reserve.

To set time, an inset push button is located between 3 and 4 o'clock.

The ring located on the case back enables the timepiece winding.

The 2 push buttons located on the case back allow a quick change of straps.

REFERENCES
