Space Jam Collector Set

Space Jam Central Tourbillon

10 PIECES

45mm, grade 5 titanium

**KROSS X
STUDIO**

«**Space Jam: A New Legacy**»

Kross Studio joins forces with Lucasfilm to create an exceptionally exclusive Star Wars-inspired collection, honoring the legendary space saga. Crafted for enthusiasts who cherish both the rich history of Star Wars, exquisite design, and high horology, the 10-piece Death Star Ultimate Collector Set stands as a testament to this unique fusion.

This extraordinary ensemble features a Death Star Central Tourbillon watch accompanied by an authentic kyber crystal movie prop from *Rogue One: A Star Wars Story*, all presented in a remarkable Imperial kyber crystal container.

KS 7'000 Caliber

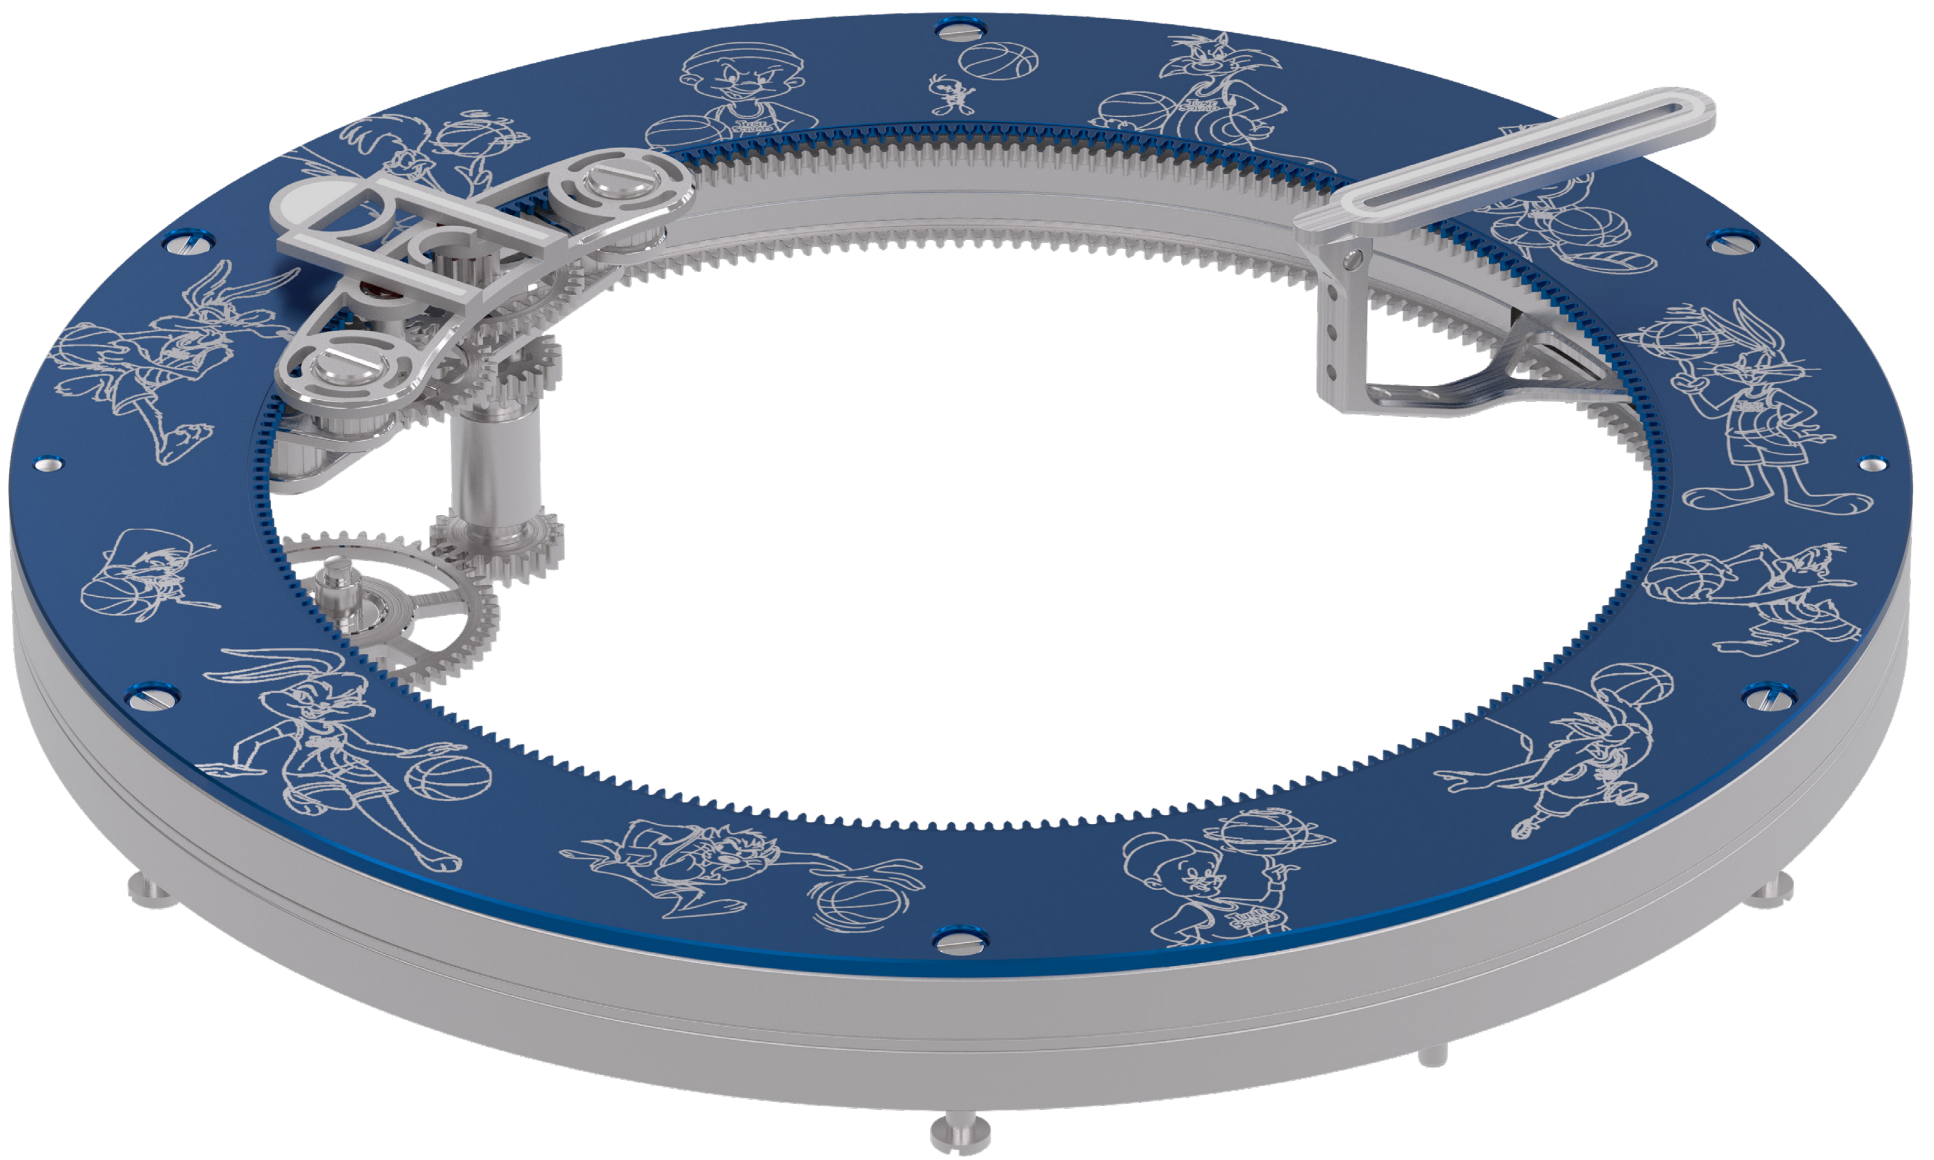

This in-house mechanical hand-wound movement, featuring an oversized barrel capable of delivering a 5-day power reserve, takes center stage within the intricate design. The absence of space around the center is ingeniously filled by placing the regulator within the central tourbillon cage, positioned atop the barrel.

Basketball-like shaped tourbillon cage

The central tourbillon cage towers over the piece, adorned with an openwork basketball-like structure that unveils its regulator beneath.

Like the majority of the watch's components, this piece has been machined in the Kross Studio workshops and meticulously hand-finished to achieve a high-end horological refinement.

It's game o'clock!

Every part of the watch encourages to stand up and be ready for action, just like the hour hand that turns into a free-throw lane, filled with white and blue Super-LumiNova®. Moreover, the hours and minutes adopt a distinctive presentation method — the hands are anchored to a peripheral display mechanism that gracefully orbits 360° around the mesmerizing tourbillon, enhancing the watch's overall dynamism and appeal. A 12-factor gear ratio allows the planetary minutes system to empower the progression of the hours.

Round up the Tunes

The Tune Squad takes center stage, engraved on the fixed hour wheel, with every member of the «Dream Team» poised for action. From iconic characters like Bugs Bunny, Lola Bunny, Daffy Duck, and Tweety to Sylvester, Marvin the Martian, Yosemite Sam, Granny, Taz, Speedy Gonzales, Elmer Fudd, and Wile E. Coyote, all the way to Road Runner – each one is prominently featured and ready to bring their unique energy to the scene.

A 45mm titanium case

The entire scene is showcased within a 45mm grade 5 titanium frame and protected by a sapphire crystal dome, elevating the watch with a distinctive expertise in horological craftsmanship.

Case Back

On the back of the case, the Studio's signature cross emblem is delicately emphasized on the barrel bridge. The fully skeletonized design provides a deep insight into the meticulously detailed components, showcasing wheels.

Winding the watch and setting the time are effortlessly achieved using the « D-ring crown» on the case back and the «Time Set» push button, strategically positioned at 3 o'clock along the watch's edge. This system not only maintains design symmetry and enhances comfort compared to a traditional crown, but it also facilitates quicker winding, adding a practical touch to the overall experience.

Interchangeable straps

The watch comes with two straps: one crafted from deep blue calfskin leather, and the other featuring laser-abraded rubber, meticulously replicating the iconic orange color and texture of a basketball.

The straps can be easily changed thanks to our interchangeable strap system, facilitated by two quick-release buttons conveniently placed on the underside of the case, allowing for seamless customization based on individual preferences.

STRAPS & CLASP

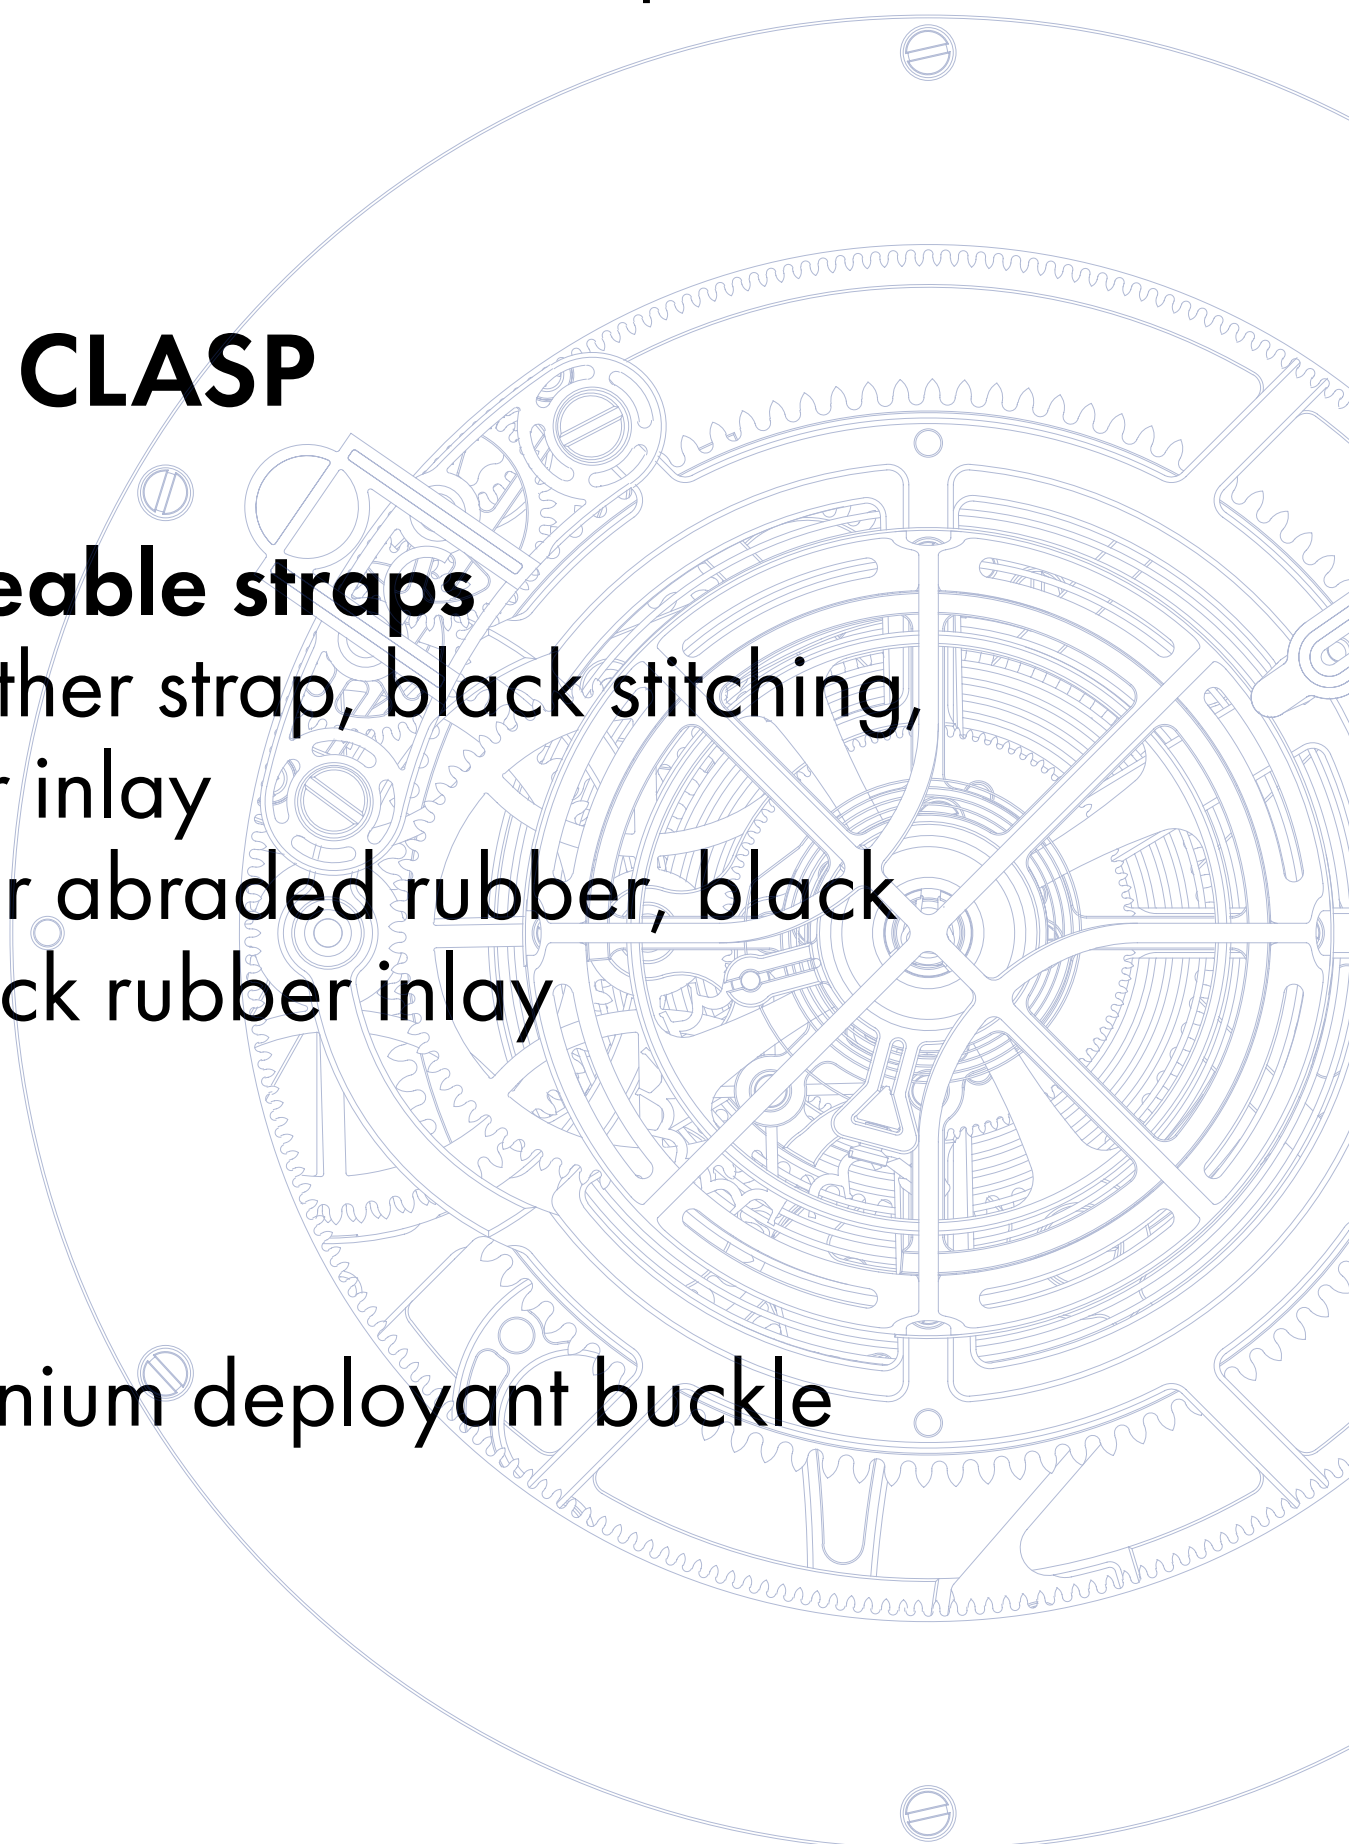

Interchangeable straps

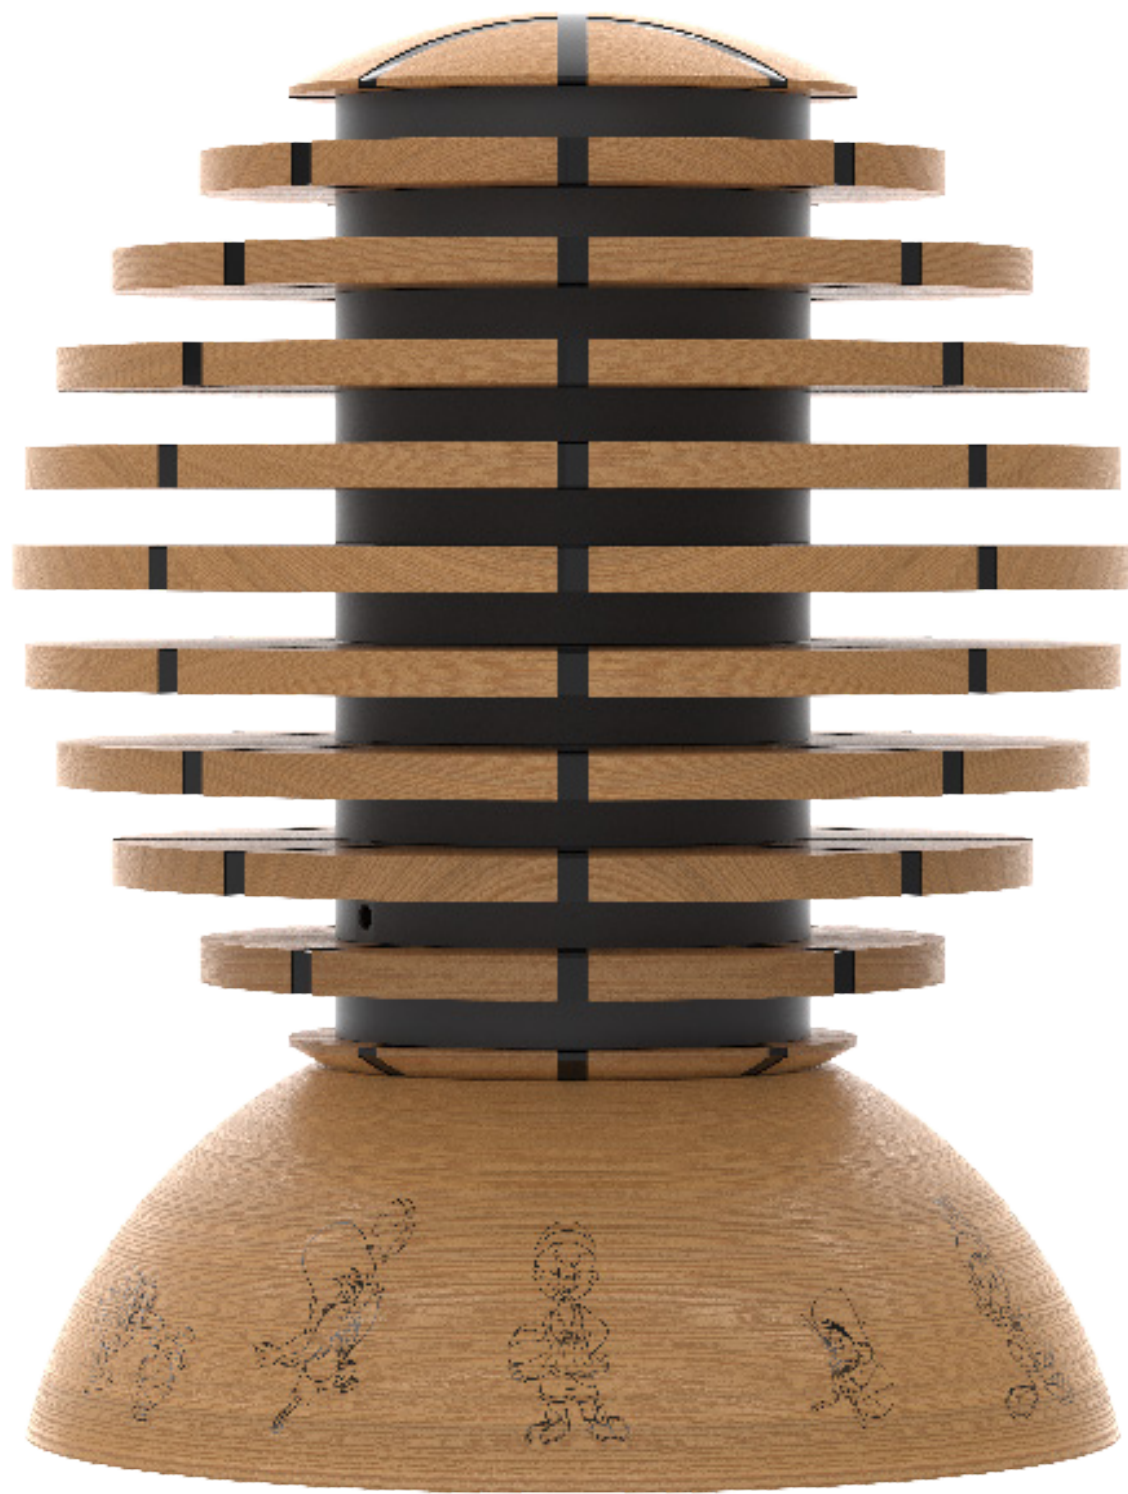

Blue calf leather strap, black stitching, black rubber inlay

Orange laser abraded rubber, black stitching, black rubber inlay

Clasp

Grade 5 titanium deployant buckle clasp

This is not a watch box

The watch is accompanied by a functional art piece, a stand-alone design sculpture known as the Kross Studio B-BALL. Crafted and engineered by Kross Studio, this sculpture takes on the shape of a basketball, intricately made from wood and aluminum. The captivating design features eleven wooden layers, symbolizing flat basketballs, arranged on a central pillar to produce an enchanting visual effect.

An immersive visual experience

The heart of the sculpture serves as a storage space for the watch, unveiling it by simply lifting the ball straight upward. This dual-purpose design adds a unique and artistic dimension to the overall presentation.
