OVERVIEW

Thank you for purchasing a Kross Studio watch roll.

Kross Studio products are made by craftsmen with the strictest requirements and incomparable know-how.

Kross Studio watch rolls are made of vegetable leather, which is a natural material that is susceptible to wrinkles, marks or patina over time. Interactions with your watch can leave slight marks.

In order to ensure the longevity of your watch roll, we recommend that you observe a few precautions for use.

REGULAR CARE

We recommend that you avoid contact with water, intense heat, direct sunlight, excess humidity or dryness so as not to alter its color and appearance.

In case of contact with water, wipe with a soft cloth to prevent the formation of traces or drying blisters.

Avoid friction with raw or dark-colored textiles so that dark colors do not color lighter leathers.

To ensure the longevity of your watch roll, we recommend that you maintain it at least once a year by following these instructions:

- Apply a small amount of universal protective and renovating cream for leather on a soft, clean cotton cloth.
- Apply the cotton cloth on the watch roll by making circular movements and massaging the leather until the product is absorbed by the material.
- Repeat as many times as necessary to cover the treated areas.
- Leave the protective cream to act for about ten minutes then brush with a clean soft cotton cloth. The friction of the cotton cloth allows the product to act and reveals all the beauty of the vegetal leather.

We invite you to carry out this operation delicately on the printed part of the watch roll so that the design is not altered.

This manipulation can be carried out on the leather in case of irritation, scratches or stains.

In the event of a stain on the high-end polyester microfiber fabric used inside the case, use a soft, slightly damp, soaped cloth and rub where necessary.

TECH SPECS AND WARRANTY

TECH SPECS

Diameter 100mm
(3.97 inches)

Thickness 75mm
(2.95 inches)

Weight 160g
(5.65 ounces)
